## Competitors Analysis

App	Description	Functionality	User Reviews and Ratings	Receive an alarm notification
UNEBO	<p>Real-time Air Alarm Updates with UNEBO - Air Alarms Transmission of real-time updates on air alarms from UNEBO - Air Alarms</p> <p>UNebo - Air Alarms is a free Android app that provides real-time information about air alarms across Ukraine. The app includes a map with all air alarms in the country, timely notifications about the start and end of each alarm, and the ability to receive notifications only for selected regions. In addition, the app offers historical and statistical data on air alarms, as well as maps with useful information such as gas stations and businesses without electricity. Users can also read news from various sources across the country.</p> <p>It is important to note that all data on air alerts is based on official information provided by the executive bodies of Ukraine and processed by the application servers for fast operation.</p>	<p>1. Map view with the alert status, with the possibility to view more details for a certain region</p> <p>2. Possibility to view what is the alert cause</p> <p>3. About the app view</p> <p>4. Settings including region selection (only regions are available)</p> <p>5. Functionality to view the military map border and the situation in that region</p> <p>6. Alert History</p> <p>7. Region alert statistics</p> <p>8. News</p>	<p>Rating: 4.0 <a href="#">link</a></p> <p>Does not work on Android 12 - <a href="#">link</a></p>	<p>The signal only sounds when the phone is on speakerphone. One sentence is announced and that's it. Not enough to feel that there is an alarm.</p>
Air Alarm Ukraine	"Air Alarm Ukraine" - an application that helps to find shelter near you and	<p>1. Possibility to view what is the alert cause</p> <p>2. About the app view</p>	<p>Rating: 3.3 - <a href="#">link</a></p> <p>Comments:</p>	<p>First, the notification After 4-5 seconds, the sound</p>

App	Description	Functionality	User Reviews and Ratings	Receive an alarm notification
	<p>informs with a push alert about air danger.</p> <p>In the application, you can track selected one or more cities or regions.</p>	<p>3. Settings including region selection (which includes regions, subregions, and cities)</p> <p>4. Possibility to add several regions at once</p> <p>5. Shelter Information</p> <p>6. Helpful phone numbers</p> <p>7. Possibility to donate</p> <p>8. Possibility to set up the notifications severity</p>	<p>1. A gorgeous app, healthy minimalism. But there is no way to reduce the volume of the sound of alerts in the app. It's very loud (scares me at night)</p> <p>2. Everything is great, but it's very confusing that the air raid sound and the air raid silence sound are identical.</p> <p>Could you please add some other sound for the alarm?</p> <p>3. It is very nice that you can choose several regions and monitor the alarm of your relatives, and in general everything is clear and convenient</p> <p>4. I haven't been using it for a very long time, but over the three years of war I have already managed to use many apps.</p> <p>This one is the simplest and most functional so far! I can add up to 8 regions or cities at once. And not just select them, but I will actually receive notifications about the alarm status! The app also has vaults, and quite informative information about them, but not for all areas. There is also a good selection of commonly accepted charitable organizations to which you can immediately make a donation! And the guys also did not forget about themselves, they also added their buymeacoffee, so you can thank them with a cup of coffee, for example, I bought three) Great app, I recommend it!</p> <p>5. Please add a widget. With the same display of the current alarm status for the area. A very necessary thing, and no one else has this functionality</p>	<p>Turns off when you click on the notification</p>
Карта Тривог	<p>The alarm map helps you to visually see in which areas or districts an air raid is currently in effect. You can also see information on how long the air alert has been in</p>	<p>1. Possibility of viewing the map</p> <p>2. View the air alert list</p> <p>3. Map Settings (light/dark mode)</p> <p>4. Map explanation</p>	<p>Rating: 3.3 - <a href="#">link</a></p> <p>Comments:</p> <p>1. For some reason it glitches when I open the card for the second time. I can't even change the</p>	

App	Description	Functionality	User Reviews and Ratings	Receive an alarm notification
	effect. Information about alarms comes from the official telegram channel.		<p>design, although this button is active. I press it and nothing happens, I can't move the card either.</p> <p>Everything is fine with the Internet. I rebooted the phone, opened the card - works, closed it, after a minute opened it - does not work. Allowed the program full screen mode - it worked! But when I opened the second time, again the same thing. How to use it? I use wi-fi, not mobile internet, can this be the reason?</p> <p>2. I'm uninstalling the program because it has stopped working.</p> <p>3. The best alarm map. I'm speaking as an IT guy and a user.</p> <p>4. The app is great, deserves 5 stars, but I have some questions for the development company. First of all, why does the app not work without an internet connection, is it so hard to do? I think it would be very important in our time, please make such a feature.🙏</p> <p>Secondly, many people in the reviews ask to add an "alarm history" in the next update, I had experience in html programming, and it seems to me that it will not be difficult to add such functionality, especially since you have a whole team of people👉.</p> <p>5. There are some flashing red areas, reconnection is very buggy</p>	
Air Raid Alert Map of Ukraine	<p>An Interactive map of air-raid alerts in Ukraine, including the reasons for the alerts, history, and statistics.</p> <p>The application is not official and not associated with the government. It is a volunteer project which uses public official data from official telegram channels like "Air alert", Region military</p>	<ol style="list-style-type: none"> <li>1. View the air alert map</li> <li>2. View the legend</li> <li>3. View the active alerts list</li> <li>4. View the threats/explosions/</li> <li>5. View the info sources</li> <li>6. View the statistics</li> </ol>	<p>Rating: 4.5 - <a href="#">link</a></p> <p>Comments:</p> <p>1. I absolutely love this app! The map is so easy to use and has a sleek design. It's incredibly intuitive, and there are plenty of settings to customize it to my liking. The app provides up-to-date information on active alerts and color codes regions with explosions, the app also displays helpful</p>	

App	Description	Functionality	User Reviews and Ratings	Receive an alarm notification
	administration, "Suspilne", etc.		<p>statistics, including the amount of alerts sorted by phase of the moon! The app keeps me calm during uncertain times. Overall, I highly recommend this app for anyone looking for a reliable source of info.</p> <p>2. The app works only when there is WiFi. Even 4G is not enough. I don't even know whether to keep it or tear it down</p> <p>3. Make a widget with the whole map please</p> <p>Not a comment, but: The app is used not only by Ukrainians but also by foreigners to monitor the situation in Ukraine. According to our statistics, there are users from all over the world.</p>	
eТривога	<p>"eAlert is a volunteer application that sends alerts to your phone about threats in the selected region of Ukraine. You will receive a sound signal from the app when an air alert is announced in your city or region, or when there is a threat of a missile attack, shelling, UAV or CAB threats.</p> <p>The app also notifies you of explosions and planned blasting operations, as well as other critical information. The app allows you to subscribe to several cities or regions at once, so you can keep your finger on the pulse with your family located in the other region.</p>	<p>1. Possibility to view what is the alert cause</p> <p>2. About the app view</p> <p>3. Settings including region selection (which includes regions, subregions, and cities)</p> <p>4. Possibility to add several regions at once</p> <p>5. Possibility to set up the notifications severity and sound</p>	<p>Rating: 4.4 - <a href="#">link</a></p> <p>Comments:</p> <p>1. On January 25, at 10:55 a.m., there was an alarm in Zaporizhzhia, the head of the military administration and the air force reported air activity, which is why there was an alarm, but your app says there is no air activity. It's not a bad app, I like it, but please make it more informative about the nature of the threats so that I don't have to go to Telegram immediately after the alarm is announced, it is very important in Zaporizhzhia, without exaggeration, seconds and minutes to assess the threat really matter!</p> <p>2. Please make the alarm announcement without a siren, just a voice notification. It will be very convenient.</p> <p>3. After reinstalling the application, notifications do not work. And about 3 weeks ago, the type of vibration of notifications changed, it used to be 0.25/0.25/0.5, which was very convenient, because</p>	<p>Immediate sound + turns off when you click on a notification</p>

App	Description	Functionality	User Reviews and Ratings	Receive an alarm notification
			you could easily determine that the vibration was from this application when you had your smartphone in your pocket	
Air Alert	<p>Install the Air Raid Alert app to receive instant notifications about air raid warnings in your selected city or region of Ukraine based on alerts from the civil defense system. With the correct settings, the app will loudly notify you of an alert, even if your phone is silent. No registration is required, and the app does not collect personal data or geolocation information. All regions of Ukraine are available, and you can also choose to receive alerts only for a specific district or territorial community.</p>	<p>1. The regional administration operator receives an air raid alert signal.</p> <p>2. The operator immediately transmits the information to the central system.</p> <p>3. The app sends a warning notification to users who have selected the affected region.</p> <p>4. When the operator issues an all-clear signal, users receive a corresponding notification.</p> <p>This is the only app that supports critical notifications, ensuring that alerts always sound at the maximum volume level of your smartphone. To enable this feature, grant the necessary permissions after installation.</p> <p>Important: User can disable critical notifications at any time in the app settings.</p>	<p>Rating:</p> <p>Comments:</p> <p>1. Thank you guys for your work, really appreciate it! But please stop improvising with alarm and sounds. The latest update with an additional voice telling that you need to hide it's too much. Just the siren sound works perfectly in my opinion. And when the air alarm is over I think there is no need in creepy sounds and repeating, the voice announcing once that air alarm is over has done the job perfectly before.</p> <p>2. Very easy to use app, most of the time the alerts are even earlier than I see in other sources. But the sound settings are awful, personally I don't need any sound from it, especially not a whole siren. The only customization for sound is an alarm volume slider, which still doesn't mute the whole thing. Please add more settings for sounds and alerts!</p> <p>3. There is no option to disable "increased risk" notification. When setting sound for this notification to 0, it still interrupts any sound playing at the moment without pausing it.</p> <p>Expected behaviour: pausing the track/video on notification (i.e. like when receiving a call when watching video stops the video). The issue makes app very annoying, especially while trying to listen to something while having multiple "increased risk" notifications, so I've deleted it.</p> <p>4. Would be neat to have the option to change the alert notification sound type-</p>	

App	Description	Functionality	User Reviews and Ratings	Receive an alarm notification
			wise, i.e. different sounds for different alerts and alert end. In my case I want to set stalker's pda blowout alerts :p But I want "air raid" have the "blowout soon" and "increased air threat" have "blowout imminent", but they go in the same notification channel, thus have the same sound. It would have brightened up my mood during air raid alerts at least a little bit. 5.
